Engineering Career Fair

We work for you. When we learned Company Search was by far the most accessed page on our site, we spent a semester retooling it in an effort to better serve you. What we ended up with far exceeded our expectations. Our new Company Search 2.0 allows you to search through all of the data we have about companies: names, descriptions, majors hiring, and even some industries. We've even included functionality to let you know about companies that are similar to the companies you like.

But we're just getting warmed up. We still have a lot of cool functions to add, so we'll keep working on this site until we think it's perfect - or more importantly, until you think it's perfect. We're here to serve you, and we hope this company search helps you find that perfect company.
